

2025 IMPACT

AT A GLANCE

2,883 Unique Individuals Served

2,380 Pregnancy Tests

843 Ultrasounds, **81%** Chose Life

530 Parenting Class Participants

68 Accepted Christ

Hope Pregnancy Centers strengthen Oklahoma communities by providing a safe, confidential and caring environment where women and men with unplanned pregnancies can explore their choices without judgment and learn of the hope they can have in Christ.

Hope helps by providing the following permission-based care:

- Professional pregnancy testing and limited ultrasounds to confirm and date pregnancy.
- Education on each pregnancy option.
- Caring staff and volunteers to listen as clients process their emotions and explore their support systems.
- Community referrals for additional needs and services.
- Support programs to walk with women and men through the decision process and their child's first year.

A Life Saved

Donelle came to Hope Pregnancy Center for a pregnancy test and ultrasound. She was withdrawn and overwhelmed and was considering a medical abortion (abortion pill). During the ultrasound, Donelle became emotional but left determined to have an abortion. Still, God was already at work.

After traveling out of state to obtain the abortion pill, Donelle was immediately filled with regret and reached out to the Abortion Pill Reversal Hotline. She was connected to Hope Pregnancy Center to begin the process of reversing the abortion pill effects. When Donelle arrived at the center, the ultrasound revealed joyful news. Her baby was still thriving and had a strong heartbeat. Donelle's demeanor had completely changed. She was joyful, grateful, and embraced the nurses. The father of the baby joined her and expressed deep appreciation for Hope and the care they received.

Abortion pill reversal saved the life of Donelle's baby! She is carrying a healthy baby and will deliver her child early this spring. Meeting someone in their fear with compassionate care and hope shows your love in action for those struggling with pregnancy decisions. Thank you for your vital role in saving lives!
